

[[{{{2}}}|{{{1}}}]]

[\[edit\]](#) [\[purge\]](#)  [Template documentation](#)
This documentation transcluded from [Template:Abbrlink/doc](#)([edit](#) | [history](#))

Usage

```
{{abbrlink|abbr|expanded term}}
```

Example:

```
{{abbrlink|Forwiki|Main_Page}}
```

Which results in: [Forwiki](#)

That is, like template `{{abbr}}` but it also creates an article link to the expanded term.
