- `{{divhide}}` (for hiding things)

There are several meta-templates in the mbox family:

- `{{ambox}}` ? For article message boxes.
- `{{tmbox}}` ? For talk page message boxes.
- `{{imbox}}` ? For file (image) page message boxes.
- `{{cmbox}}` ? For category message boxes.
- `{{ombox}}` ? For other pages message boxes.
- `{{mbox}}` ? Has namespace detection, for message boxes that are used on several types of pages and thus need to change style depending on what page they are used on.

Closely related meta-templates:

- `{{fmbox}}` ? For header and footer message boxes.
- `{{dmbox}}` ? For disambiguation and set index message boxes.
- `{{asbox}}` ? For article stub message boxes.
