

## Usage

`{{sc}}`, named after **small caps**, is a more robust and consistent WYSIWYG extension of `{{Smallcaps}}`, backward-compatible in syntax and results. It will rewrite your text using typographical SMALL CAPS. This template is especially useful for name/surname disambiguation in lead sections, and to lighten all-caps words or pronounceable acronyms.

**Code**      `Adolfo {{sc|B|ioy| C|asares}}`

**Displayed** Adolfo BIOY CASARES

**Pasted**    Adolfo BIOY CASARES

Contrary to `{{Smallcaps}}`, the text will still show the disambiguated "Adolfo BIOY CASARES" (instead of "Adolfo Bioy Casares") in:

- A copy-pasted version of the text.
- A degraded version displayed by a non-CSS browser, or one whose CSS has been disabled, or portable devices such as mobile phones.
- An excerpt as displayed in the results of search engines such as Google.

This preserves the benefit of small caps where they were judged useful.

**Code**            `{{sc|The Lord G|OD| was the L|ORD| in 4004  
|BC}}`

**Displayed**      The Lord GOD was the LORD in 4004 BC

**Pasted**          The Lord GOD was the LORD in 4004 BC

In this case, the pasted/degraded/excerpted text will retain proper theological caps (instead of the erroneous "The Lord God was the Lord in 4004 bc" that `{{Smallcaps}}` would give.)
