

Template:Templatesnotice

The following is inserted by this template; documentation for this template itself is below.

Template documentation

This documentation transcluded from Template:Templatesnotice/inner([edit](#) | [history](#))

Usage:

```
{{subst:templatesnotice|subst=subst:}}
```

```
{{subst:templatesnotice|Article|subst=subst:}}
```

references a specific article

```
{{subst:templatesnotice|Article|Additional text|subst=subst:}}
```

adds text onto the end of the message instead of "Thank you"

- This template has been carefully designed based on guidelines by the user warnings project.
- Please discuss the general visual appearance of these templates (for example, the image in the top-left corner) on the user warning talk page.
- Please refer to the index of message templates before using any template on user talk pages to warn a user. Applying the best template available for your purpose may help reduce confusion from the message you are sending.
- Please remember to substitute the template using {{subst:templatesnotice}}

rather than {{templatesnotice}}.

- This template uses a parser function. To give greater detail to your message, you may add the article and some additional text to the end of the template.
- Optionally, add |subst=subst: to the end of the template to reduce the code in the final output:
{{subst:templatesnotice|Article|Additional text|subst=subst:}}

.
